center *of* attention

The wedding cake is a focal point at the reception and will show up in dozens of photos. Leave the baking to the pros and turn your attention to the cake table itself. No plain white tablecloths here. Our seasonal ideas for creating a showstopper really take the cake.

Winter wonderland

The classic sophistication of a white-on-white color scheme is perfect for a snowy winter wedding. Hinged doors, a glass chandelier, an elegant four-tier cake, and black-and-white photos combine to create an unforgettable display.

Love is like a rose

Floor-to-ceiling roses can turn any table into a romantic and dreamy display. This simple space was transformed by layering roses and greenery on four columns, then lining the tabletop and floor with even more pink petals.
